

We pay so that we can hear what we want without all the commercials that "free" radio has. If I want to listen to the local traffic and weather without commercials, shouldn't I have the right to do so? I don't see the NAB trying to get weather out of newspapers. This is a shot against those that don't want to conform and listen to the crap on local airwaves. If the NAB doesn't want to listen to the local commercial free weather and traffic, tell them not to subscribe to XM.
